DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-30, drawn to packaging (for cosmetics), classified in class 206, subclass 581.
- II. Claims 31 and 32, drawn to a method of using a packaging (for cosmetics), classified in class 53, subclass unknown.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process for using the packaging could be practiced with a flexible heat-resistant bag, or the packaging could be used to hold medicine tablets .

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

If Applicant elects Invention I above, Applicant must also elect a species as follows, for examination purposes.

Within the packaging claims 1-30, this application contains claims directed to the following patentably distinct species of the claimed invention:

- Species I, as shown in Figs 1A and 1B;
- Species II, as shown in Figs 2, 7, 8, 9, and 10;
- Species III, as shown in Figs 3-6 and 24-26;
- Species IV, as shown in Fig 11;
- Species V, as shown in Fig 12;
- Species VI, as shown in Fig 13;
- Species VII, as shown in Fig 14;
- Species VIII, as shown in Figs 15-19;
- Species IX, as shown in Fig 20;
- Species X, as shown in Fig 21;
- Species XI, as shown in Fig 22;
- Species XII, as shown in Fig 23.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims appear to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A request was made to Mr Janal Kalis, Attorney for the Applicant, on 19 June 2003 to request a tentative election, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
